Two main market sectors, the telecommunications and Aerospace and Defense industries, show revenue growth in the double digits.

54% sales increase in Asia

Geographically, sales were divided into 28% from Europe, 34% from Asia and 38% from North America.

Asia confirmed its strength, with turnover in this region increasing from € 9.7m to € 15 million euros per year. For the third quarter, revenue in all three areas was almost equal, maintaining a geographically-balanced trend that began in 2009 and on which the Group has focused its marketing efforts.

The last quarter has helped to generate a € 12.58 million turnover, up 5.6% over the previous quarter.

53% sales increase in telecommunications

The telecommunications sector grew rapidly in 2010. It represented 43% of revenue, or € 18.7 million as compared to € 12.2 million (35%) in 2009. This increase is partially explained by dynamic

growth in the market, particularly in smartphones, and also through a breakthrough product line, "dosimetry," which represents 3.6% of the year's activity.

The field of Aerospace and Defense was also active in 2010, especially in North America and Asia. It represented 57% of the Group's revenue (€ 25.1 m) as compared to 65% (€ 22.7m) in 2009.

The Group's solid performance and trends will be announced with the publication of audited results on Tuesday, April 26, 2011.

About MICROWAVE VISION:

MICROWAVE VISION (NYSE-Euronext: ALMIC) is a leading global manufacturer of test systems and antenna measurement in the fields of Radio Communications, Automotive, Defense and Aerospace. With the integration of ORBIT/FR, Inc. (OTC Bulletin Board: ORFR), a U.S. company acquired in May 2008, the Group was able to develop an innovative market offer. It combines precision electronic scanners developed by SATIMO Industries under its "microwave vision" technology" with ORBIT/FR's high performance electromechanical positioners and scanners. MICROWAVE VISION is located in 8 countries - France, Italy, Germany, Sweden, USA, Israel, China, and Japan, and has 240 employees. The group has a loyal clientele of many international companies. It achieved € 43.9 million in revenue in its fiscal year ended December 31, 2010. MICROWAVE VISION benefits from its certification as an OSEO "Innovative Company."
