## 2009 Year Sales at €34.9m Order book of €31.9m

### Annual sales up 23%

Annual sales of the Microwave Vision Group at December 31 2009 were €34.9m\*, up 23% from 2008\*\*.

The fourth quarter confirmed this good performance with sales of €11m, up 33% compared to the previous quarter 2009.

\* Non-audited sales figures

\*\* The year 2008 was exceptionally only 9 months, from April to December, following a decision to align the closing of the accounting year with that of ORBIT/FR acquired in 2008. Sales for this period were €21.3m. This figure was readjusted according to a 12-month period, to €28.4m.

### Sustained growth on the American continent

Annual activity represents 44% on the American continent, 28% in Asia and 28% in Europe. The three zones all contributed to the Group's growth. In the American zone, just as we expected, the smart-phones market and the Aerospace and Defense market were driving forces resulting in a 37% increase in sales compared to 2008. In Europe, activity rose 20%, mainly as a result of the Aerospace and Defense market. In Asia, the more modest climb in activity of 8% does not reflect the current recovery observed, namely on the Civil Telecommunications market for the testing of base stations.

### Strengthening of the Aerospace and Defense sector

The Aerospace and Defense sector was strong in 2009, representing 65% of the Group's sales versus 51% in 2008. As for the Civil Telecommunications sector, it represents 35% for 2009 compared to 45% in 2008. The Group is expecting a more even distribution between activities in 2010.

### An increasing order book

The outlook for the Microwave Vision Group's order book is promising. It stands at **€31.9m for the end of 2009** versus €30.6m at the end of September 2009, and €21m at the end of 2008.

### Cash at €4.5m at December 31 2009

At the end of the year, cash and cash equivalents of the Microwave Vision Group continued to show good results at €4.5m\*\*\*, up 18% compared to the end of 2008.

**This level of activity, which meets the objectives, in addition to the profit derived from adjustments made to the cost structure over the past few months, should allow the Group to record an operating profit once again as early as 2009. These results will be communicated on April 14 2010.**

\*\*\*Sum of current financial assets and cash that we previously disclosed, less current financial liabilities.

#### About MICROWAVE VISION:

MICROWAVE VISION (NYSE-Euronext: ALMIC) is one of the leading world producers of antenna test and measuring systems for the radiocommunication, automotive, defense, and aerospace fields. With the inclusion of the business activities of ORBIT/FR Inc. (OTC Bulletin Board: ORFR), an American company purchased in May 2008, the group is strengthening its position on its markets by offering the most innovative and comprehensive solutions available. The range of solutions offered combines high-precision electronic scanners developed by SATIMO INDUSTRIES using its "microwave vision" technology with ORBIT/FR products developed using high-performance positioner and electromechanical scanner technology. MICROWAVE VISION is present in 8 countries (France, Italy, Germany, Sweden, USA, Israel, China, and Japan) and has 240 employees. The group boasts a clientele of major international accounts. It recorded sales of €34.9m for its year ended December 31 2009. MICROWAVE VISION is OSEO certified "Innovative Enterprise."
